

Accelerating Discovery of Novel High Entropy Alloys and Oxides with Multiple Functionalities

Research Roadmap Workshop Agenda: Tuesday Nov 12 – Wednesday Nov 13

Day 1 Morning Presentations

9:30 - 9:45 Coffee

Setting the Stage

9:45 - 9:50 Welcome and Opening Remarks

- *Dustin Gilbert, University of Tennessee Materials Science and Engineering*

9:50 - 10:20 State of the Art in High Entropy Materials

- *Easo George, UTK and ORNL*

Future Potential – Informative quick-sessions by relevant experts highlighting how the unique qualities of high-entropy materials respond to current challenges in functional materials science and present new opportunities to expand our fundamental understanding.

10:20 - 10:35 Superconductivity

- *Zac Ward, Oak Ridge National Laboratory, Materials Science and Technology*

10:35 - 10:50 Magnetism

- *Brianna Musico, University of Tennessee, Materials Science and Engineering*

10:50 - 11:05 Thermal and Thermoelectrics

- *Jon-Paul Maria, University of Pennsylvania, Materials Science and Engineering*

Agency Priorities – Brief overviews of the priorities of federal agencies and how research in functional high-entropy materials might fit within those priorities.

11:10 - 11:25 AFOSR

- *Jay Tiley, Multiscale Structural Mechanics and Prognosis*

11:25 - 11:40 ONR

- *TBD*

11:40 - 11:55 NSF

- *TBD*

12:00 – 1:30 Break for Lunch

Day 1 Afternoon Discussions

1:30 – 1:45 Coffee and discussion

Breakout Sessions: Where do we go from here? – A session dedicated to three approaches to high-entropy materials research, discovery and development, identifying the challenges and the paths forward.

1:45 - 3:00 Group 1 – Rapid Testing and Development

- *Moderator: Hugh Medal, UTK Industrial and Systems Engineering*
- *Note taker: Harry Richards, UTK*

Group 2 – Computation and Modeling

- *Moderator: Haixuan Xu, UTK Materials Science and Engineering*
- *Note taker: Candice Marie Kinsler-Fedon, UTK*

Group 3 – Material Properties

- *Moderator: Dustin Gilbert, UTK Materials Science and Engineering*
- *Note taker: Brianna Musico, UTK*

3:00 - 3:15 Coffee Break

Group Discussion

3:15 - 3:45 Report outs from Breakout Sessions

- *Group Note Takers*

3:45 - 5:00 Scope and Scale of the Research Roadmap for High Entropy Multifunctional Materials

- *Moderator: Harry Richards, UTK Engineering Research Office*

5:00 - 5:10 Wrap-up First Day and Objectives for Day 2

- *Dustin Gilbert, UTK*

Accelerating Discovery of Novel High Entropy Alloys and Oxides with Multiple Functionalities

Research Roadmap Workshop Agenda: Tuesday Nov 12 – Wednesday Nov 13

Day 2 Sessions

8:00 – 8:15 Coffee and Discussion

On the Road

8:15 - 9:00 Review, Discuss, and Revise the Roadmap

- *Moderator: Dustin Gilbert, UTK*

9:00 - 10:15 Participant “Chalk” Talks (up to 6 for \approx 12 min each)

Dustin Gilbert, UTK

Kris Reyes, University of Buffalo, Materials Design and Innovation

Raj Banerjee, University of North Texas, Materials Research Facility Director

Don Brenner, North Carolina State University, Materials Science and Engineering

10:15 - 10:30 Coffee Break

10:30 - 11:45 Participant “Chalk” Talks (up to 6 for \approx 12 min each)

11:45 - 12:30 Wrap-up and Next Steps

- *Moderator: Harry Richards, UTK*

Participant Name	Organization	Area of Interest/Program	Contact
Dustin Gilbert, Chair	Tennessee	Novel Functional Materials	dagilbert@utk.edu
Haixuan Xu, Co-Chair	Tennessee	Computational Materials Science	hxu8@utk.edu
Hugh Medal, Co-Chair	Tennessee	Optimization Research	hmedal@utk.edu
Jay Tiley, Co-Chair	AFOSR	Multiscale Structural Mechanisms and Prognosis	jaimie.tiley@us.af.mil
Harry Richards	Tennessee	Engineering Research Office, Organizer	harry@utk.edu
Brianna Musico	Tennessee	Organizer	bmusico@utk.edu
Candice Marie Kinsler-Fedon	Tennessee	Organizer	
Raj Bannerjee	North Texas	Material Microstructure	raj.bannerjee@unt.edu
Donald Brenner	North Carolina State	Formation Kinetics and Simulation	brenner@ncsu.edu
Ken Caster	AFOSR	Organic Materials Chemistry	organic@us.af.mil
Lisa Debeer-Schmitt	ORNL	Magnetic Structure	debeerschmlm@ornl.gov
Peter Frazier	Cornell	Optimization and Machine Learning	pf98@cornell.edu
Easo George	Tennessee/ORNL	Behavior and Testing of Materials	egeorge@utk.edu
Aura Gimm	AFOSR	Natural Materials, Systems, and Extremophiles	afosr.nature@us.af.mil
Ken Goretta	AFOSR	GHz THz Electronics and Materials	ghz.thz@us.af.mil
Michelle Jamer	Naval Academy	Thermoelectrics	jamer@usna.edu
Bruce LaMattina	Tennessee	Associate Vice Chancellor for Research	blamatti@utk.edu
Les Lee	AFOSR	Mechanics of Multifunctional Materials and Microsystems	mmmm@us.af.mil
Alexis Lewis	NSF	Civil, Mechanical, and Manufacturing	alewis@nsf.gov
Kai Liu	Georgetown	Magnetism	kai.liu@georgetown.edu
Lynnette Madsen	NSF	Materials Research Division	lmadsen@nsf.gov
Jon-Paul Maria	Penn State	Thermodynamics	jpm133@psu.edu
Dan Miracle	AFRL	Phase Stability	daniel.miracle@us.af.mil
David Ott	DARPA	Strategic Technology Office	david.ott.ctr@darpa.mil
Kris Reyes	Buffalo	Computation and Machine Learning	kreyes3@bufflao.edu
Martin Schmidt	AFOSR	Dynamic Materials and Interactions	dynamicmaterials@us.af.mil
Dave Shifler	ONR	Propulsion Materials	david.shifler@navy.mil
Margo Staruch	NRL	Magnetics	margo.staruch@nrl.navy.mil
Kenneth Vecchio	UC San Diego	Phase Space Navigation	kvecchio@ucsd.edu
Zac Ward	ORNL	Magnetism	wardtz@ornl.gov
Judy Yang	NSF	Metals and Metallic Nanostructures	juyang@nsf.gov
